		Additional Information (see
		below)

A review of this project application information did not include a review of minimum separation clearances from overhead electrical distribution wares (conductors) and transformers or other matters for which specific information was not provided. The owner/applicant is required to seek and obtain such other approvals as may be necessary. In all cases, the most restrictive condition applies. Where other restrictions cause any change to the location or construction of this project, such changes must be reviewed and approved by the Chief Building Official prior to construction.
